

MEDICAL ASSISTANT REPORT

2025-09-28 03:47:03

SUMMARY OF FINDINGS

The patient, a female, presents with a continuous, throbbing headache of 11/10 severity, localized to both sides of the head, which started yesterday. She denies any associated symptoms, previous similar headaches, or other currently relevant medical conditions, and no recent lifestyle changes. Her medical history includes asthma, she is allergic to peanuts, and currently takes Ibuprofen.
